ALERT SYMBOLS

The following symbols used in this manual, alert you to potentially dangerous conditions to users, service personnel or the appliance:

WARNING

This symbol refers to a hazard or unsafe practice which can result in severe personal injury or death.

CAUTION

This symbol refers to a hazard or unsafe practice which can result in personal injury or product or property damage.

01 - SAFETY INSTRUCTIONS

Read this booklet carefully before using this air conditioner. If you still have any difficulties or problems, consult your dealer for help.

This air conditioner is designed to give you comfortable room conditions for domestic use. As far as industrial and professional activities are concerned, Argoclima declines all responsibility for any unsuitability of the appliance depending on its characteristics and the purposes it should be responsible for.

WARNING

Never use or store gasoline or other flammable vapour or liquid near the air conditioner. It is very dangerous. Moreover, never install electrical equipment, which is not protected with IPX1 protection (protection against vertical water drop), under the unit.

The manufacturer assumes no responsibilities if the safety regulations or local codes are not observed.

CAUTION

Never use neither the power main switch or the power plug to start or stop the air conditioner. Always use the ON/OFF button.

- Do not stick anything into the air outlet of the air conditioner. This is dangerous because the fan is rotating at high speed.
- Do not let children play with the air conditioner.
- Do not cool the room too much if babies or invalids are present.
- This air conditioner can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the air conditioner in a safe way and understand the hazards involved.
- Cleaning and user maintenance shall not be made by children without supervision.
- For safety, be sure to turn the air conditioner off and also to disconnect the power before cleaning.

02 - INSTALLATION LOCATION

WARNING

- Do not install this air conditioner where there are fumes or flammable gases, or in an extremely humid space such as a green house.
- Do not install the air conditioner where excessively high heat-generating objects are placed.
- Do not install the air conditioner where the atmosphere is extremely damp or humid (e.g. greenhouse or laundry) it could be wetted by drops of water (i.e. in laundries).

AVOID:

To protect the air conditioner from heavy corrosion, avoid installing the outdoor unit where salty sea water can splash directly onto it or in sulphurous air near a spa.

Make sure that there are no obstacles around the indoor unit affecting the free circulation of air. Do not block the air intake and outlet of the unit with curtains or other. Never put objects on the top of the unit.

03 - ELECTRICAL REQUIREMENTS

Before using the appliance

- Check that the power supply at the location where the air conditioner is going to be used is 220/240 volt, single phase.
- For your safety care check periodically the conditions of the electric supply cable; the electrical connection of the unit is Y type with cable prepared in a special way; in case you should notice any damage due to usage, call the nearest After Sale Service to get the cable replaced.
- Before connecting the air conditioner to a power socket, make sure that the socket is provided with an earth connection.
- Verify that the available power supply is sufficient for running other electrical domestic appliances in use simultaneously from the same supply. See the data plate on the unit showing the max. absorbed powers.
- Install a double-pole switch, protected fuses of the delayed type, upstream the electricity wall socket 10A.
- Make sure that circuit breakers, fuses, etc. are of sufficient capacity to handle start - up current (normally for no longer than a second).
- All wiring must conform to the local electrical codes. Consult your dealer or a qualified electrician for details.

WARNING!

The air conditioner is provided with a time-guard system, which does not allow re-starting of compressor until after 3 minutes from a previous stop.

NOTE

This air conditioner is equipped with cooling, drying and fan functions. Details on these functions are provided here following; refer on these descriptions when using the air conditioner.

OPERATING LIMITS

COOLING

MAXIMUM CONDITIONS	OUTDOOR TEMPERATURE	46°C D.B.
	ROOM TEMPERATURE	32°C D.B./23°C W.B.
MINIMUM CONDITIONS	OUTDOOR TEMPERATURE	19°C D.B.
	ROOM TEMPERATURE	19°C D.B./14°C W.B.

DECLARATION OF CONFORMITY

This product is marked with the CE mark because it conforms to the following directives:

- Low Voltage Directive 2006/95/CE. (Standard: EN60335-2-40:2003 (incl. Corr.:2006) + A11:2004 + A12:2005 + A13:2012 + A1:2006 + A2:2009 with EN 60335-1:2002 + A11:2004 + A1:2004 + A12:2006 + A2:2006 + A13:2008 + A14:2010 + A15:2011).
 - Electromagnetic compatibility 2004/108/CE, 92/31 EEC and 93/68 EEC. (Default: EN55014-1(2006) + A1(2009) + A2(2011), EN 55014-2 (1997) + A1(2001) + A2 (2008), EN 61000-3-2 (2006) + A1(2009) + A2(2009), EN 61000-3-3 (2008)
 - RoHS2 n.2011/65/EU.
 - Regulation (EU) no. 206/2012, of March 6, 2012, on the specifications for ecodesign of air conditioners and fans.
 - Regulation (EU) no. 626/2011, of May 4th, 2011, on the labeling of energy consumption of air conditioning systems.
- In the event of incorrect use of the device and/or non-observance of even just parts of the operating manual and the installation instructions this declaration becomes invalid.

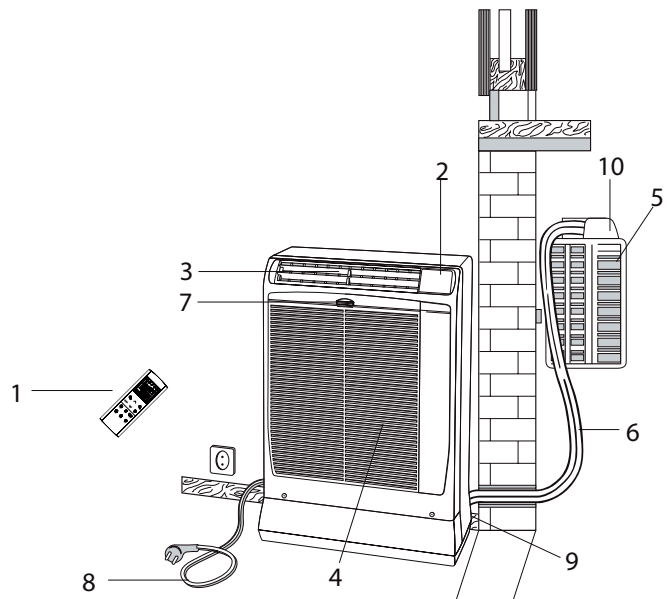

Argoclima S.p.A.

Via Alfeno Varo 35, 25020 Alfianello (BS)

Room air conditioner with remote condenser **CMK 4000**

04 - PRODUCT IDENTIFICATION

1. Infrared rays remote control unit
2. Monitor panel
3. Supply air deflector
4. Return air grille
5. Outdoor unit
6. Flexible tube
7. Air filter
8. Power cable with plug (about 2.30 m)
9. Service tube for condensate evacuation
10. Quick coupling cover

05 - MONITOR PANEL

Definition of the LED lamps:

Timer = YELLOW

Operation = GREEN

Standby = RED

1. Time setting lamp (TIMER): This lamp lights up when a timer is activated (see section "TIMER SELECTION").

2. OPERATION lamp: This lamp lights up when you switch on the unit.

3. STANDBY lamp: This lamp lights up when the air conditioner is connected to the power and ready to receive the remote control command.

4. Receiver: It receives signals transmitted from the remote control.

5. Operation button (without remote control): Push the button to switch on or off the unit (see section "OPERATION WITHOUT REMOTE CONTROL UNIT"). Press and hold this button for 5 seconds to enable the WiFi configuration (Only for WiFi models, see "WiFi INSTRUCTIONS" manual).

WARNING

The OFF position does not disconnect the power. Use the main power switch to turn off power completely.

NOTE

Please note that the color representation of the control panel on the device may vary and that the representation in these operating instructions may differ. However, this does not affect the functionality and is purely optical in nature.

NOTE

Only if an error message is displayed, it may be necessary to carefully unplug the indoor unit to drain excess water. In other cases, the plug should not be removed.

06 - AIR CONDITIONER INSTALLATION

The air conditioner is made of two units interconnected by a flexible tube. The indoor unit must be placed in the room to be air conditioned, near a window, a balcony-door or a perimeter wall. The outdoor unit, that provides the disposal of heat and condensation, must be located outside, on a window sill, on a balcony or hanged to the wall.

NOTE

It is strongly recommended to place a neutral pad under the feet of the unit to protect the floor from possible indentations.

Place the outdoor unit, which dissipates the heat and through which the condensed water is disposed of, on the balcony, on a window sill or hang it on the outside wall.

POSITIONING OF OUTDOOR UNIT

The outdoor unit must always be kept in vertical position and levelled. Make sure that there are no obstacles around the unit affecting the free circulation of air. A lug at the rear bottom of the unit ensures the minimum distance from the wall (3 cm). The unit must be kept at a minimum distance of cm. 15 (sidewise) and cm. 80 (frontally) from any walls.

INSTALLATION TYPE A

If your room has a balcony or a window-sill of sufficient depth (min. 25 cm) you may rest the unit freely onto it. For safety's sake, you may anchor the unit to the window-sill using one M6 x 20 expansion bolt in the slot of the lug at the rear bottom of the unit. The flexible tube may easily pass through the balcony door or window shutters set ajar.

INSTALLATION TYPE B USING THE OUTDOOR UNIT SUPPORT BRACKET KIT (NOT SUPPLIED)

You can buy separately the support bracket kit to fix the outdoor unit to the wall, as follows:

1. Fix the support guide to the wall below the window sill.
 2. Insert the support in the handle of outdoor unit, and turn the outdoor unit upside down as shown in the picture.
 3. Place the support and secure it at the edge of the unit, using the screws.
 4. Insert the support, fixed on the unit, at the guide fixed to the wall.
- Make sure it is levelled.

IMPORTANT ADVICE

IMPORTANT ADVICE OUTDOOR UNIT

1. When you move the outdoor unit, always hold it by the handle, never pull it by the flexible tube.
2. Never let the outdoor unit hang on the flexible tube.
3. When you recover the outdoor unit after operation, drain away any remaining condensate by tilting the unit.

Room air conditioner with remote condenser **CMK 4000**

08 - USING THE REMOTE CONTROL UNIT

HOW TO INSTALL BATTERIES

- Remove the lid in the rear part of the remote control unit.
- Insert two AAA alkaline batteries of 1,5 V-DC making sure that point in the direction marked in the battery compartment.
- Set the clock (see procedure on page 8). Remote controller is now ready for operation.
- The batteries last about six months. Depending on how much you use the remote control unit. Remove the batteries if you do not use the remote control unit for more than one month. Replace the batteries when the battery symbol appears on the remote control (☐).
- The batteries of the remote control contain polluted substances. Exhausted batteries must be disposed according to the laws in force.

HOW TO REMOVE BATTERIES

- Remove the lid.
- Press the battery toward the negative end and lift it out by its positive end (as shown in the figure).
- Remove the other battery in the same way.

Programming the remote control

- The batteries must be inserted in the remote control.
- When the keyboard is locked (the icon  lights up on the display), unlock the keyboard by pressing the power button. Hold for 2 seconds until the icon  turns off.
- Press and hold the ECO button  for 5 seconds until "02" appears on the display.

The remote control is now configured for use with your unit. This setting is retained even if the batteries are removed.

TEMPERATURE SENSOR SELECTOR

- Under normal conditions the room temperature is detected and checked by the temperature sensor placed in the remote controller (IFEEL  icon displayed). This function is designed to provide a comfortable room temperature by transmitting the temperature control command from the location next to you. When using this function, the remote, control should always be pointed at the air conditioner, therefore it should be placed in a position in which it is visible by the indoor unit (for example, do not put it in a drawer).
- It is possible to disable the remote controller room sensor pressing the FAN/IFEEL  button for a few seconds. In this case the icon on the remote controller display lights off and the sensor placed in the air conditioner becomes active.

NOTE

The remote control unit transmits signals to the indoor unit each time you press a key and at any temperature change detected by the internal sensor. In case of troubles (low batteries, remote control placed in a position not visible by the indoor unit,...) room temperature control is automatically switched to the sensor of the indoor unit. In this case, the temperature around the remote control unit may differ from the temperature detected in the air conditioner position.

PERATION WITH THE REMOTE CONTROL UNIT

When using the remote control unit, always point the unit transmitter head directly at the air conditioner receiver.

09 - REMOTE CONTROL UNIT

DISPLAY

Information is displayed when the remote controller is switched on.

Operation mode

-  Cooling
-  Dehumidification
-  Fan
-  Automatic

Fan speed

Temperature

Days of the week

Clock

Timer: 3 types + delayed timer

HEATING MODE: not active on this unit

FLAP: not active on this unit

IFEEL mode is active
(remote controller sensor active)

Night mode

TURBO mode

ON/OFF BUTTON

Press this button to turn the air conditioner ON / OFF.

Press for 2 seconds to lock / unlock the buttons 

TRANSMITTER

When you press the buttons of the remote control unit, the  mark appears on the display to transmit the setting changes to the receiver in the air conditioner.

SENSOR

A temperature sensor inside the remote control unit detects the room temperature. (see on the back of the remote control unit)

MODE SELECTOR BUTTON

Press this button to modify the air conditioner mode.

-  COOLING
The air conditioner makes the room cooler.
-  HEATING (not available)

 DEHUMIDIFYING (DRY)
The air conditioner reduces the humidity in the room.

 FAN
The air conditioner works only as a circulation fan.

 AUTOMATIC = 

FAN/IFEEL BUTTON

Press this button to change the fan speed.

 Fan speed is automatically selected by the unit.

-  Low speed
-  Medium/low speed
-  Medium speed
-  Medium/high speed
-  High speed
-  Very high speed

IFEEL MODE

Press this button for a few seconds to modify the active setting for room temperature detection (from remote controller to air conditioner and viceversa).

NIGHT BUTTON

Press this button in order to select the NIGHT mode.

ECO BUTTON (not active)

Through the inverter compressor is always given an ECO operation.

FILTER BUTTON
(INACTIVE BUTTON)

CLOCK AND TIMER SETTING BUTTON
Press this button in order to select the desired timer.

Press for 2 seconds to set the timer
For details refer to paragraphs "HOW TO SET THE PRESENT TIME", "TIMER SELECTION", and "SETTING THE TIMER".

LIGHT BUTTON

Press this button to turn the unit display on or off

TEMPERATURE SETTING BUTTONS

- (cooler)
Press this button to decrease the set temperature.

+ (warmer)
Press this button to increase the set temperature.

USE THESE BUTTONS ALSO FOR TIMER SETTING

FLAP BUTTON
(INACTIVE BUTTON)

TURBO BUTTON

Press this button in order to select the TURBO mode.

09 - REMOTE CONTROL UNIT

HOW TO SET THE CLOCK

1. Press for a few seconds the Timer button .
Press the button .

2. AM or PM starts flashing: use the arrows to choose AM or PM, then confirm with .
The hour indication starts flashing: set the hour with the arrows, then confirm with .
The minutes indication starts flashing: set the minutes with the arrows, then confirm with .
WEEK starts flashing: set the day of the week with the arrows, then confirm with .

3. At this point the procedure is finished: press the button  to exit the clock menu.

COOLING / AUTOMATIC MODE

1. Turn on the unit with the ON / OFF button.
2. Press the button  until the COOLING symbol  appears on the display.
3. Press the buttons   to set the desired temperature (the temperature range is between 10 °C and 32 °C).

20^{SET}°C THE DISPLAY SHOWS THE SELECTED TEMPERATURE AND THE WORD "SET".

25^{°C} AFTER 5 SECONDS FROM THE REQUIRED TEMPERATURE SETTING THE DISPLAY WILL SHOW THE ROOM TEMPERATURE AGAIN.

4. Press the button  to select the fan speed.

NOTES

If the fan is set in automatic mode and the unit stops because setpoint is reached, also the fan will stop.
If the fan is set in one of the six manual speeds, it will go on operating at the selected speed, even if the unit stops due to reaching the setpoint.

When the external or internal temperature is too low, the unit could limit the speed of the compressor or switch it off for a certain period of time to avoid the formation of ice on the internal heat exchanger.

DEHUMIDIFYING MODE (DRY)

1. Turn on the unit with the ON / OFF button
2. Press the button  until the DEHUMIDIFYING symbol  appears on the display.
3. Press the buttons   to set the desired temperature (the temperature range is between 10 °C and 32 °C).

20^{SET}°C THE DISPLAY SHOWS THE SELECTED TEMPERATURE AND THE WORD "SET".

25^{°C} AFTER 5 SECONDS FROM THE REQUIRED TEMPERATURE SETTING THE DISPLAY WILL SHOW THE ROOM TEMPERATURE AGAIN.

NOTES

- Use DRY operation when you want to reduce the humidity in the room.
- Once the room temperature reaches the set level, the unit repeats the cycle of turning on / off automatically.
- During DRY operation, the fan speed is automatically set (Remote control lamp  AUTO ON) to maximize dehumidification.
- Dry operation is not possible if the indoor temperature is less than 10 °C.

FAN ONLY MODE

If you want to make air circulate without any temperature control, press the button  until the FAN symbol  appears on the display.

ADJUSTING THE FAN SPEED

AUTOMATIC

Set with the button  the "AUTO" position . The unit automatically controls the fan speed. When the air conditioner starts operating, the fan speed varies according to the thermal load of the room .

NOTE

In FAN ONLY mode, the AUTOMATIC speed corresponds to the high speed H.

MANUALE

If you want to manually adjust the fan speed just set the button  as desired:

- | | |
|---------------|----------------|
| L Low | MH Medium-high |
| ML Medium-low | H High |
| M Medium | VH Very high |

09 - REMOTE CONTROL UNIT

NIGHT MODE

This program is used to increase silence and comfort during the night.

To activate the Night mode:

1. Press the button  to set the air conditioner in cooling or dehumidification.
2. Press the button .
3. The symbol  appears on the display. Press the button again to release the function.

What does the NIGHT mode mean?

When you select the NIGHT mode, the air conditioner will modify automatically the set temperature after 60 minutes: it will be raised by 1°C.

This enables you to save energy without sacrificing your comfort.

NOTE

During the NIGHT mode the internal fan speed is automatically lowered, reducing the noise.

TURBO MODE

This program is used to increase the maximum power that can be supplied by the air conditioner, even if it involves less silence.

To activate the Turbo mode:

1. Press the button  to set the air conditioner in cooling.
2. Press the button .
3. The symbol  appears on the display. Press the button again to release the function.

TIMER SELECTION

To select the timer, press the button  to switch on the remote control, then press the button  to choose the desired schedule:

-  → ①
 → ③ or "OFF"

NOTE

In the event of a power failure and restoration, the timer selection must be performed again.

HOW TO SET SCHEDULES

A) DELAYED TIMER

This timer is used to start the unit (if it is off) or to stop the unit (if it is on) after a certain time, to set the delayed time.

1. Press the Timer  button for a few seconds.
2. Press the arrow "up"  to select the delayed timer .
3. Press the button : the hour indication starts flashing; set the hour with the arrows.
4. Press the button  again: the minutes indication starts flashing; set the minutes with the arrows.
5. Confirm with the button , then press the button  to exit the delayed timer menu.

8:00 

ARROWS

B) SCHEDULE ① ② ③

This timer is used to turn the unit on and off at predefined times and days.

1. Press the Timer  button for a few seconds.
2. Press the arrow "up"  to select the schedule to be set (①, ② or ③).
3. Press the button : ON indication starts flashing.
4. Press the button  again: AM indication starts flashing (you can choose AM or PM with the arrows).
5. Press the button : the hour indication starts flashing; set the desired hour with the arrows.
6. Press the button  again: the minutes indication starts flashing; set the minutes with the arrows.
7. Press the button : OFF indication starts flashing.
8. Repeat the same procedure to set AM or PM, hour and minutes.
9. At this point, press the "up"  arrow and WEEK will start flashing.
9. Press the button : the indication of the first day of the week starts flashing; set ON or OFF with the arrows, then confirm with the button .
9. The indication of the second day of the week starts flashing: repeat the procedure with every day of the week, if desired.
10. At the end press  to exit the menu.

00

WEEK
AM 8:00 

ARROWS

0F

WEEK
PM 18:00 

NOTE

- It is possible to set up to 3 weekly schedules at different times using the timers.

RESET BUTTON

Press the RESET button on the back of the remote control if you want to reset all settings and return to the factory setting.

Room air conditioner with remote condenser **CMK 4000**

10 - PARAMETERS SETTING

To access to the "Parameter menu", long press "MODE/SET" from the main screen or from the OFF screen:

When a parameter has been selected, long press "MODE/SET" to modify the value of the parameter. The value of the parameter starts blinking and SET symbol switches on:

Press "UP" or "DOWN" to modify the value of the parameter, then press "MODE/SET" to save and transmit the selected value of the parameter or press "ON/OFF" to restore the previous value of the parameter:

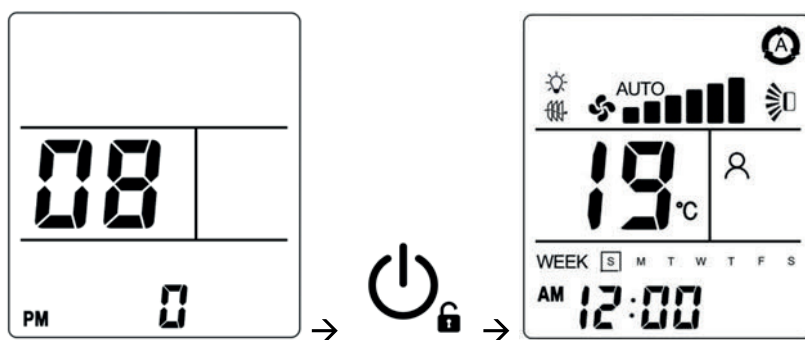

CLIMIA

10 - PARAMETERS SETTING

Press "ON/OFF" to go back to main screen:

Par.	Parameter name	Min	Default	Max	Values
P00	Factory default reset	0	0	3	0 = No action 1 = Reset all remote control parameters to factory default value
P01	Software version	0	-	7	Software version of the remote controller
P05	Temperature scale	0	0	1	0 = °C (Celsius) 1 = °F (Fahrenheit)
P06	Transmission channel	0	0	3	0 = Channel #0 1 = Channel #1 2 = Channel #2 3 = Channel #3
P12	ECO mode power input limit	30	75	99	When ECO mode is selected, max electrical power input of the unit is limited to P12: Leistung auf P12 begrenzt: 0 = 30% of Max Power Input 31 = 31% of Max Power Input ... 99 = 99% of Max Power Input

NOTE
Parameters not listed in the table are reserved and should not be changed. Changing the parameters not listed can cause the air conditioner to malfunction.

Room air conditioner with remote condenser **CMK 4000**

11 - WiFi CONFIGURATION (FIRST START)

1. Connect the unit to the power supply.
2. Check if the WiFi status LED (dot on the bottom right of the display) is flashing. If it is not blinking, unplug the power supply and wait for the display to turn off. Then reconnect the power supply.

3. Within 5 minutes, connect to the „UI_setup“ WiFi network by manually selecting it from the list of available WiFi networks or by capturing the QR code shown on the side.
4. If the phone reports an internet connection error, e.g. „No internet connection“, select the option to stay connected to the configuration WiFi „UI_setup“.
5. When the connection to the WiFi network is successfully established, the WiFi status LED will start flashing faster.
6. Within 10 minutes, connect to the web page from the browser at <http://192.168.4.1> with the smartphone connected to the WiFi network „UI Setup“ or scan the QR displayed on the side-Code.

7. The configuration screen shown below will appear. Select the network you want to connect to from the drop-down menu.
8. Enter the password of the selected WiFi network.
9. Press the „WiFi Connect“ button to confirm the entered data and connect to the WLAN.

10. In the APP account area, the default username and password are displayed (automatically generated by the unit). Make a note of this information for future access to the APP.
11. Tap "APP Connect". If the credentials are correct the confirmation message „ACCOUNT CREATED OK“ is displayed.
12. Wait for the unit to connect to the WiFi network. If the connection is successful, the WiFi status LED will stop blinking and stay on.

WiFi Setup
ACCOUNT CREATED OK
WIFI SSID
MAV-WLAN3
WIFI Password
micro
APP account:
Username: MavTest1

APP Connect

When properly configured and connected to the internet, the unit can be controlled and monitored via a dedicated web APP. To use this feature, you must use the username and password previously created during the configuration phase and have received account creation confirmation (ACCOUNT CREATED OK). In this case you can proceed as follows:

1. Check if the unit is connected to WiFi (WiFi status LED on display is solid).
2. Open the web APP by connecting to the address <http://31.128.210/UI/WEBAPP/webapp.php?logo=Argo> or scan the adjacent QR code.

NOTICE:

To access the WEBAPP, the smartphone or tablet must also be connected to the Internet.

3. The login screen shown below will appear:
Enter your username and password and log in.
It is recommended to check the „Remember me“ box for faster access when using it at night.

argo
improve your life
User Name
Password
Remember Me
Log In

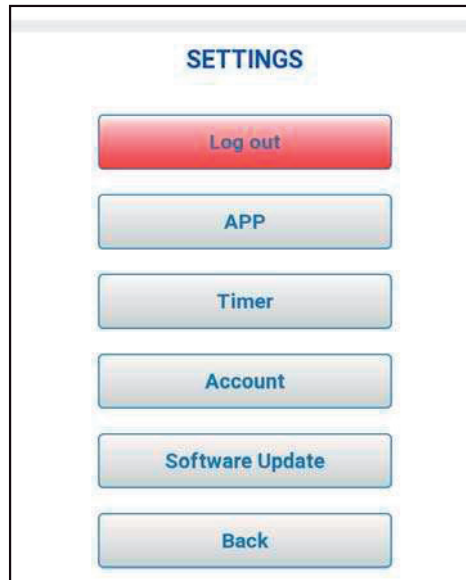

Room air conditioner with remote condenser **CMK 4000**

4. Once you are logged in, the following page will appear:

Use the APP as a remote control of the unit. For instructions on how to use the remote control, see this guide.

Tap this button to change the settings.
The following screen will appear:

Log out: Finish the process and return to login
APP: Change APP settings (language etc.)
Timer: Setting on and off times
Account: Change or delete account
Software Update: Update device software
Back: return to the main page

Meaning of the symbols

		APP and unit communicate with each other over the Internet (WAN)
		APP and unit communicate with each other through the router (LAN)
		APP is connected to the internet server but not communicating with the unit
		APP does not communicate with the unit and cannot access the internet server

5. When using a smartphone or tablet, it is recommended to save the application in the device at home for faster access and a more functional working screen. To do this, follow the next steps:

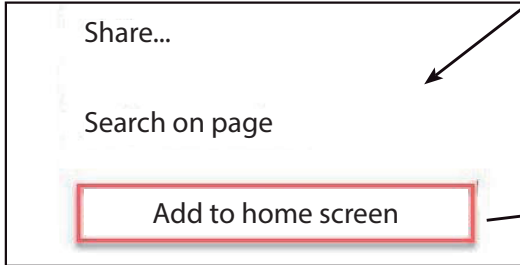

If you are using an iOS device: Select „Add to Home“. If it's not visible, scroll down, until it appears. The application icon is added to the HOME screen to access the WEBAPP.

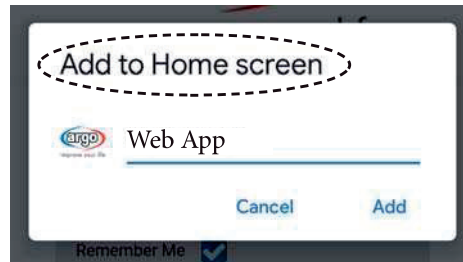

If you are using an ANDROID device:

Tap on the adjacent symbol (top of screen)

Select „Add to Home Screen“

The screen is displayed:
Enter a name.

WIFI NETWORK RESET

Press the control button of the unit for 5 seconds to reset the WiFi network access data, e.g. to connect to a new network or to change the settings of the existing network. You will hear a beep and the WiFi status LED will start flashing.

Follow the instructions in the WiFi configuration section again.

CONFIGURATION ISSUES

Error messages: Some error messages may appear during the connection test. Possible Messages are shown below.

USN or PSW ERROR!!: This message may indicate that the username or password for the account you entered is already in use. Therefore, it is not possible to create an account with these credentials. You will need to change your username and password and create a new account.

NO WIFI CONNECTION: This message indicates that the connection to the selected WiFi network could not be established.

Possible causes are:

1. Wrong password.
2. Temporary failure of the specified WLAN.
3. Encryption type is not supported. The supported encryption types are listed below:
Open, WEP, WPA_PSK, WPA2_PSK, WPA_WPA2-PSK
WPA2_Enterprise is currently not supported.

NO SERVER FOUND: This message indicates that a connection to the server could not be established. Possible causes are:

1. Lack of Internet connection for the specified WLAN. There may be a problem with the router. Turn off the modem and restart it.
2. Temporary network disruption. Repeat the startup process in 30 minutes. If the problem persists, contact customer service.

Room air conditioner with remote condenser **CMK 4000**

12 - ADJUSTING THE AIR FLOW DIRECTION

VERTICAL

Hold the end of the flap and move it up and down to adjust the vertical air flow.

HORIZONTAL

The horizontal air flow can be adjusted by moving the vertical blades to the left or right, as indicated in the following figure.

CAUTION

Set vertical blades to the front position during COOLING/DRY operation if humidity is high. If the vertical blades are set to the left-most or right-most position, condensation will form around the air outlet and drip off.

13 - OPERATION WITHOUT THE REMOTE CONTROL UNIT

If necessary, the air conditioner can operate without a remote control:

1. WHEN THE AIR CONDITIONER IS OFF

If you want to turn on the air conditioner push the OPERATION BUTTON to select the COOLING mode:

NOTE

The air conditioner will start in HIGH fan speed. The temperature setting is 25°C.

1. WHEN THE AIR CONDITIONER IS ON

If you want to turn off the air conditioner push the OPERATION BUTTON again.

NOTE

Power failure during operation.

In the event of power failure, the unit will stop. When the power is restored, the unit automatically restarts after 3 minutes. The operating settings are stored 1 minute after the last remote control signal received from the unit.

BETRIEBSTASTE

14 - CARE AND CLEANING

CAUTION

For safety, be sure to turn the air conditioner off and also to disconnect the power before cleaning.

OUTDOOR UNIT (CASING AND CONDENSING COIL)

- Some metal edges and the condenser fins are sharp and may cause injury if handled improperly; special care should be taken when you clean these parts.
- Periodically check the outdoor unit to see if the air outlet or air intake are clogged up with dirt or soot.
- The condenser and other components of the outdoor unit must be cleaned periodically. Consult your DEALER or AFTER SALES SERVICE.

INDOOR UNIT

- Do not pour water on the unit to clean it. This will damage the internal components and cause an electric shock hazard.
- Never use solvents, or chemical agents when cleaning the indoor unit. Do not wipe the plastic casing using very hot water.

Casing and Grille:

Clean the casing and grille of the indoor unit with a vacuum cleaner brush, or wipe them with a clean, soft cloth. If these parts are stained, use a clean cloth moistened with a mild liquid detergent. When cleaning the grille, be careful not to force the blades out of place.

CLIMIA

AIR FILTER

The air filter must be checked at least once every two weeks operation. Operation with a dirty filter always causes a lower efficiency of the air conditioner and severe product damage. The filter is located at the back of the intake grille in the front of the air-conditioner and shall be removed from the upper side of the unit.

HOW TO REMOVE THE FILTER

FILTER CLEANING

Use a vacuum cleaner to remove light dust. If there is sticky dust on the filter, wash the filter in lukewarm, soapy water, rinse it in clean water, and dry it.

TRANSPORT

Keep the air conditioner in the vertical position during transportation.

STORAGE

If you are not going to use the air-conditioner for a long period, clean the air filters, evacuate the condensate from the indoor unit through the drain hose at the unit back side. Do not disconnect the flexible tube, unless you are obliged to do it: in that case protect the open halves of the couplings, after disconnecting it and before handling the flexible hose and the outdoor unit; utilize the plastic plugs supplied as accessories, that must be tightened with a spanner. After handling, reconnect the flexible tube to the outdoor unit to avoid refrigerant leaks during the storage. Do not put heavy objects on the top of the unit, and protect it with a cloth or a plastic bag.

OUTDOOR UNIT SUPPORT BRACKET KIT

Wall mount

Bracket

Room air conditioner with remote condenser **CMK 4000**

16 - TIPS FOR MAXIMUM COMFORT AND REDUCED CONSUMPTION

AVOID:

- Block the air intake and outlet of the unit. If they are obstructed, the unit will not work well, and may be damaged.
- Let direct sunlight into the room. Use sunshades, blind or curtain.

CHECK:

- Always try to keep the air filter clean. A clogged filter will impair the performance of the unit.
- To prevent conditioned air from escaping, keep windows, doors and any other openings closed.

17 - TROUBLESHOOTING

- The use of portable telephones near the air-conditioner may cause disturbance to its normal operation and must be avoided. In case abnormal operation is noticed, (OPERATION lamp lights but outdoor unit will not run) to restore normal operation turn-off electric supply for 60 seconds at least, by disconnecting the main switch or the wall plug, then start again the air-conditioner.
- The blinking OPERATION lamp, together with the stop of the air conditioner for a short time are due to the exceeding condensate drainage. (see table "AUTO-DIAGNOSIS")
- If the OPERATION lamp goes on blinking and the air conditioner definitely stops means that the condensate pump is not working or that the condensate drain pipe in the flexible connection pipe is obstructed; in this case contact the AFTER SALE SERVICE. In case of emergency the air conditioner can work by draining the condensate from the back little pipe into a rather short container: extract the little pipe and remove the cap.
- If your air conditioner does not work properly, first check the following points before requesting service. If it still does not work properly, contact your dealer or service center.

Trouble:

The air conditioner does not run at all.

Possible cause:

1. Power failure.
2. Leakage breaker tripped.
3. Line voltage is too low.
4. Operation button is OFF.
5. Batteries in remote control unit have run down.

Remedy:

1. Restore power.
2. Contact service center.
3. Contact service center.
4. Press the button again.
5. Replace batteries.

Trouble:

Compressor runs but soon stops.

Possible cause:

Obstruction in front of condenser coil.

Remedy:

Remove obstruction.

Trouble:

Poor cooling performance.

Possible cause:

1. Dirty or clogged air filter.
2. Heat source or many people in room.
3. Doors and/or windows are open.
4. Obstacle near air intake or air discharge port.
5. Thermostat is set too high.

Remedy:

1. Clean air filter to improve airflow.
2. Eliminate heat source if possible.
3. Shut them to keep the heat or cold out.
4. Remove it to ensure good airflow.
5. Set the temperature lower.

Trouble:

Clicking sound is heard from the air conditioner.

Possible cause:

Any plastic parts may expand or shrink due to a sudden temperature change. In this event, a clicking sound may occur.

Remedy:

This is normal, and the sound will disappear when an even temperature is settled.

AUTO-DIAGNOSIS

N.	LED			POSSIBLE CAUSE	REMEDY
	TIMER	OPERATION	STANDBY		
					
-		•		Heating mode not available	Select an available mode
E1				Communication error with HMI receiver PCB (WiFi model only)	Contact service centre
E2	OO			Condensate drainage error (float error)	Contact service centre
E3	•	•		PFC error (over current, over voltage or PFC communication error)	Contact service centre
E4		•	O	Internal fan malfunction	Contact service centre
E5	•	O		Inverter PCB overtemperature (compressor module)	Contact service centre
E6	O	•		Compressor overcurrent	Contact service centre
E7	O			Defective or disconnected indoor air sensor (RAT)	Contact service centre
E8			O	Defective or disconnected coil sensor (ICT)	Contact service centre
E9	OO			Defective or disconnected compressor discharge temperature sensor (CDT)	Contact service centre

OO = LED off

• = LED on

 = flashing LED

Definition of the LED lamps: Timer = YELLOW / Operation = GREEN / Standby = RED

INFORMATION FOR CORRECT DISPOSAL OF THE PRODUCT IN ACCORDANCE WITH THE EUROPEAN DIRECTIVE 2012/19/EU

At the end of its working life this equipment must not be disposed of as an household waste. It must be taken to special local community waste collection centres or to a dealer providing this service. Disposing of an electrical and electronic equipment separately avoids possible negative effects on the environment and human health deriving from an inappropriate disposal and enables its components to be recovered and recycled to obtain significant savings in energy and resources. In order to underline the duty to dispose of this equipment separately, the product is marked with a crossed-out dustbin.

INFORMATION FOR CORRECT DISPOSAL OF THE BATTERY IN ACCORDANCE WITH THE EUROPEAN DIRECTIVE 2006/66/EC AND MODIFICATIONS INTRODUCED BY DIRECTIVE 56/2013/EU

Please replace battery when its electricity charge is used up: please do not eliminate this battery together with normal household waste. It must be taken to special local community waste collection centres or to a dealer providing this service. Disposing of a battery separately avoids possible negative effects on the environment and human health deriving from an inappropriate disposal and enables its components to be recovered and recycled to obtain significant savings in energy and resources. In order to underline the duty to dispose of this equipment separately, the battery is marked with a crossed-out dustbin.

REGULATION (EU) No. 517/2014 - F-GAS

The unit contains R32, a fluorinated greenhouse gas with a global warming potential (GWP) of 675. Do not release R32 into the atmosphere.
